

**Christian Boitard**

# **Le Diabète**

## **Bibliographie académique**

Le monde a célébré en 2022 le centenaire de la découverte de l'insuline. Elle inaugura un grand chapitre de la médecine, un siècle de bouleversements des connaissances à un rythme que l'histoire moderne de la biologie n'avait jamais connu.

Le livre de Christian Boitard, *Le Diabète. Une histoire de l'insuline*, introduit le champ des maladies métaboliques, des maladies chroniques, non transmissibles qui ont envahi le siècle et le monde, dont le diabète est un paradigme.

Cette bibliographie rassemble les articles et publications académiques cités directement ou indirectement dans cet ouvrage. Pour plus de lisibilité, ces sources sont triées dans l'ordre de leur citation dans le livre.
